EDUCATIONAL TRAINING EQUIPMENT

*Turnkey Solutions
for Science and
Technology
in Education*

- Vocational Training
- Industrial Training
- Universities & Teacher Training
- Secondary Schools

EduTeq Limited was established in 2002 by an experienced group of practitioners who have over 50 years of collective experience in implementing educational and industrial projects around the world.

EduTeq provides world class turnkey solutions and systems integration for Engineering, Science and Technology Applications in Education, Training and Industrial environments. A single source through which you can define, design, equip and maintain your laboratory or workshop facility.

We offer a comprehensive range of services from project definition and planning through to equipment installation, commissioning, and training primarily for:

- Industrial Training Centres
- Vocational Training Centres
- Universities and Teacher Training Colleges
- Secondary Schools

Projects are co-ordinated and managed by a highly motivated and professional group of practitioners who have many years of experience implementing educational projects around the world.

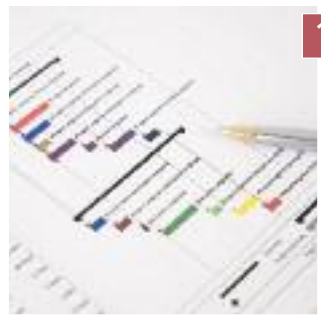

Our turnkey approach to project implementation ensures that your project is effectively managed from concept to completion.

We recognise that each project is different and demands a tailor-made response, so if you would like to discuss your requirements with us in greater detail, please do not hesitate to contact us.

Our vision at EduTeq is to be considered as the leading global service provider in the creation and implementation of technology rich education and training solutions and industrial applications. Our customers are typically overseas governments in the Human Resource Development sectors, multi-national industrial organisations responsible for the provision of industrial training, particularly in the oil and gas sectors, and United Nations organisations responsible for social and industrial development.

Added Value Services

1 Project Definition

Planning, organising and managing resources to ensure that project objectives are achieved

- Identification of goals & objectives
- Needs analysis and curriculum mapping
- Feasibility and appraisal studies
- Cost benefit analysis
- Master planning
- Preparation of tender ready specifications
- Budgetary analysis

2 Facilities Planning

Verification of design functionality ensures fitness for purpose

- Stakeholder consultation
- Co-ordination with designers
- Space optimisation analysis
- Detailed CAD layout drawings
- Site service utility review (e.g. power, gas, water, lighting, ventilation)
- Foundation and site access review
- Safety risk analysis and compliance to international standards
- Environmental impact review

3 Global Procurement

Driving value for money and product choice

- Competitive pricing
- Proven supply chain
- Products manufactured to international standards
- Homogeneity of products
- Latest technologies

4 Systems Integration

Our turnkey solution delivers total functionality

- Technical viability
- Single source vendor accountability
- Turnkey capability for fixtures, furniture and equipment (FF&E)

5 Logistics Management

Equipment arrives at the right place at the right time in prime condition

- Seamless supply chain management in difficult environments
- Strategic consolidation warehousing throughout the world
- Proven supply chain partners
- Specific expertise in multi-site DDU deliveries
- Smart technology inventory control and tracking systems

6 Operational Excellence

Aspiring to world class performance through leadership and teamwork

- Hands-on project management
- Continuous quality improvement programmes
- Focus on customer needs
- ISO 9001 Certification

7 Delivering Project Sustainability

Optimising the product life cycle and pedagogical deliverables

- Established acceptance protocols and methodologies
- Asset registration and bar-coding
- Centralised spare parts inventory
- Provision of technical manual library
- Installation and break-in testing
- Commissioning and preventative maintenance
- Extended product warranty and after sales service
- Innovative delivery of learning and training
- Specialised external training and professional development

8 Innovative Financial Solutions

A unique mix of funding options to finance your project

- Access to Development Bank funding
- Mixed Export Credits from G7 source countries
- Utilisation of Bi-lateral and Aid programmes
- Public / Private Partnerships
- Offset Agreements
- Multi-currency contracting options

Our turnkey services can be integrated into bespoke solutions that meet your specific supply needs.

Areas of Expertise

Aeronautical Engineering

Agricultural Engineering

Air Conditioning & Refrigeration

Automotive Technologies

Biology

Building & Construction

Chemical Engineering

Chemistry

Civil Engineering

CNC & Industrial Automation

Electrical Engineering

Environmental Engineering

Forensic Science

Forging & Foundry

Health Sciences

Information & Communication
Technology

Mechatronics

Metallography & Materials Testing

Millwrighting

Physics

Plumbing

Process Control & Engineering

Quality Control
& Testing Laboratories

Veterinary Sciences

Welding & Fabrication

Woodworking Technologies

Alliance Partners

The equipment, instrumentation and related supporting services supplied by EduTeq are produced by leading global manufacturers and service providers of industrial and training equipment for engineering and science applications.

These alliances developed over many years of trading ensure that the latest innovation and technologies are included in our offerings to our clients.
